

Industrial GAS Cylinders Tracking Software

iGAS 2.0 is a new age cylinder tracking software that helps your organization in tracking the Cylinders or Stock at your finger tips from a laptop or on a mobile phone. Empowers your Office staff to use it on any browser over internet and your drivers to supply cylinders at last mile of delivery. Extensive enquiry & reporting ability in software helps to manage better utilization of your cylinders and get a maximum turnaround. It also helps in Liquid stock management and Cylinder filling for gas filling stations.

- Setup with-in 24 hours and start using the software.
- Private cloud database for each company for secured data storage.
- InApp scan for QR metal rings or Plastic QR Stickers (including 3rd party)
- Web browser based app & Android mobile app with access controls.
- Flexible pricing model – One time onboarding and monthly rental based on cylinders.
- Optional modules including Invoicing, Purchases, and Collection/Payments.
